

DID YOU KNOW?

Patients taking *Hydroxychloroquine (Plaquenil)* require ongoing retinal monitoring.

Retinal toxicity can occur before symptoms develop.

Hydroxychloroquine (Plaquenil) is commonly used to treat:

- Rheumatoid Arthritis
- Lupus
- Autoimmune Disorders

Regular retinal imaging can help detect early changes and **protect vision.**

Don't forget to ask:
"Are you currently taking Plaquenil?"

Early detection today...
Better vision tomorrow.
